

# PhD opportunity to join NICER BIOFUELS

University  
of Seville

NICER BIOFUELS is an ambitious project sponsored by the Spanish Research Agency and the Next Generation Europe funds whose main aim is to convert bio-waste into the next generation of biofuels for heavy transport.

A **fully funded PhD opportunity and a 2-year Postdoctoral Position** are open for applications to join the project at the University of Seville. *For the PhD post Candidates should have a master degree on Chemistry / Chemical Engineering or a related discipline. Experience in Catalysis and high pressure processes (i.e. FTS) is desired. For the Postdoctoral position Experience in Fischer-Tropsch synthesis is a "must have".*

A competitive salary, outstanding research facilities, an international environment and a beautiful city are waiting for you! If you are interested, please contact
